12 Daehak10-gil, Gwanak-gu
Seoul, South Korea

Interests

Bouldering, hiking, cooking

ABOUT ME

Economist and quantitative researcher with over three years of hands-on experience building and analyzing large-scale datasets on the South Korean economy. My work combines applied econometrics, GIS-based spatial analysis and modeling, applied in cross-border research partnerships. I am set to complete a Ph.D. in economics with a specialization in spatial economics in November, and looking to apply my expertise to new challenges.

EDUCATION

Oct. 2022 – Present	Ph.D. in Economics UNIVERSITY OF DUISBURG-ESSEN · Germany Thesis title: Place-Based Policies in South Korea Coursework: Theoretical Foundations in Regional and Urban Economics
Mar. 2021 – June 2021	Study Abroad DANKOOK UNIVERSITY · South Korea Grade: A+
Apr. 2019 – Dec. 2021	M.Sc. in Economics TU DRESDEN · Germany Grade: 1.3 Thesis title: The Impact of Trade Liberalization on Health Care Service Provision Coursework: Topics in International Trade, Advanced International Trade, New Economic Geography
Oct. 2015 – July 2019	B.A. in Economics GEORG-AUGUST UNIVERSITY OF GÖTTINGEN · Germany Grade: 2.2 Thesis title: The Impact of Trade Liberalization on International Trade Coursework: Money and International Finance, Economic Growth and Development

RESEARCH EXPERIENCE

Oct. 2022 – Present	Doctoral Researcher MERCATOR SCHOOL OF MANAGEMENT, UNIVERSITY OF DUISBURG-ESSEN · Duisburg, Germany - Constructed and parameterized a quantitative spatial model of the Korean economy to evaluate public-sector relocation policies, highlighting the role of housing and amenities for successful place-based policies - Compiled and cleaned road- and rail-data to build a simulation of the Korean transport network to predict commuting- and freight-flows. - Constructed and analyzed multiple large-scale datasets, including data on housing transactions, local wages, residential and workplace choice, migration, firms and industrial complexes combining administrative, web-scraped, and spatial sources. - Built one of the most comprehensive datasets on the Korean economy at the firm/industrial-complex level (1,000+ complexes; universe of establishments 1994–2020) and at the household level (countrywide, district-level population, workers, wages, and housing costs). - Created maps and model visualizations for a number of academic presentations. - Employed frontier econometric methods to evaluate Korean place-based policies and their impact on Korean people and industry. - Wrote publication-ready academic papers for top economics journals, working with researchers in Germany and Korea. - Integrated AI tools (Claude Code, Codex, translation and visualization tools) into the research workflow, improving turnaround on data processing, coding, documentation and presentation.
May 2025 – Sep. 2025	Research Assistant UNIVERSITY OF MANNHEIM · Mannheim, Germany - Built local labor market definitions from Korean administrative and commuting data. - Collected and structured historical Korean industrial finance data. - Provided institutional knowledge about industrial development in South Korea and advised on research direction.

RESEARCH STAYS ABROAD

June 2026 – Sep. 2026	Visiting Researcher SEOUL NATIONAL UNIVERSITY · Seoul, South Korea Ongoing research stay to prepare a joint project for publication. Combining a dataset on Korean industrial complexes with data in the local data center on 40 years of manufacturing establishments.
Sep. 2024 – Nov. 2024	Visiting Researcher SOGANG UNIVERSITY · Seoul, South Korea Built direct access to Korean government and statistical office datasets while working in Sogang's data center, combining firm and establishment level data.
June 2023 – Aug. 2023/ July 2024 – Aug. 2024	Visiting Researcher DANKOOK UNIVERSITY · South Korea Dataset construction and empirical analysis for research on high-speed rail access effects on manufacturing establishments, in partnership with Prof. Jaewon Jung (School of Business and Economics).

CIVIL SERVICE & FIELD RESEARCH EXPERIENCE

2014 – 2018	Archaeological Excavation Fieldwork (7 excavations) UNIVERSITY OF GÖTTINGEN · Lower Saxony, Germany Progressed from excavation and technical documentation to informally supervising small teams of students and volunteers across multiple field seasons; specialized in CAD-based surveying.
Sep. 2014 – Aug. 2015	Bundesfreiwilligendienst (Federal Volunteer Service) SEMINAR FÜR UR- UND FRÜHGESCHICHTE, UNIVERSITY OF GÖTTINGEN · Göttingen, Germany Classified, cleaned, and cataloged archaeological finds from hundreds of find-spots; maintained a database used for cataloging; provided IT and administrative support.

SKILLS

Languages	German (native), English (fluent), Korean (beginner)
Programming	R (incl. <code>sf</code> package), Python (basic), MATLAB, $\LaTeX$
GIS & Spatial	ArcGIS
Other Technical Skills	MS Excel/Access, AutoCAD, TachyCAD
AI Tools	Claude Code, Codex, AI-based translation and visualization tools
